How to update the firmware of Powerline Adapters via web-based management interface?

Mercusys is dedicated to improving and richening the product features, giving you a better network experience. We will release the latest firmware at Mercusys official website (www.mercusys.com). You can download and upgrade the latest firmware for your device.

To update the firmware, follow the steps below:

Step 1

Decompress the package to obtain the update file.

For a wireless Powerline Adapter, you may obtain a combination of **BIN file**.

Note: The upgraded firmware version must correspond to the hardware.

Step2

Login the web interface via Utility or the domain name.

The domain name is mwlogin.net;

If you want to access via the Utility, please kindly click the "**Website**" button.

Step3

Go to **Settings-> Firmware Upgrade** page.

Firmware Upgrade

Upgrade firmware from a local file.

Select your upgrade file, then click Upgrade.

Hardware Version: MP510 1.0

Firmware Version: 1.0.0 Build 201102 Rel.38416n (6985)

New Firmware File: [   ]

BROWSE

UPGRADE

Step4

Click **Browse** to locate the downloaded new firmware file, and click **Upgrade**. Wait a few minutes for the upgrading and rebooting.

Note:

1. Before upgrading the firmware, it's better to back up your current settings. Click **Backup** to save a copy of the current settings to your local computer. A **config.bin** file will be stored to your computer.

Backup

Save current range extender settings to a file.

BACK UP

2. During the upgrading process, do not turn off or reset the extender.
